LUCKY METAVERSE

WHITEPAPER

INTRODUCTION

KYC – Passed (Doxxed with all marketing partners)
Audit – Passed (Contract checker AUDIT completed,
Certic Onboarding
after launch)

WHAT IS THE LUCKY METAVERSE (LMETA) PROJECT?

LUCKY METAVERSE (LMETA) is an all-in-one
package metaverse, p2e 3D gaming and NFT project
that interacts across almost all crypto functions in a
symbiotic relationship. The LMETA project combines
all possible ways to earn in crypto.

LMETA is a project that combines some aspects of Defi
with Meta and NFT to provide maximum opportunity
for investors and game lovers to profit while being
entertained.

LMETA token is a reward for passion
gaming project that provide a passive earning avenue
for game users in form of an in-game reward directly
into their wallets in addition to fascinating game
graphics.

Who is on the team? Have you all worked together for a while?

The LMETA team also known as the META GATE KEEPERS, are a team of crypto tech experts and PR from Europe and the CEO is based in Dubai. The team provided their services to the METAFACE Project with a $2.0m MC during the bull period in 2021, which is now Meta morphed in to the LMETA Project with the prospect of a $100m MC in 60-90 days.

The LMETA team trust each other to perform their roles and work towards a shared vision, together we will succeed.

LMETA-NOMICS

When purchasing LMETA you can expect a 5% buying tax, when selling LMETA there is an 11% sell tax. The taxes provide the liquidity needed for the distribution of the 5% BnB rewards, 1% Lottery to top 150 holders and 1% to all other holders. Remaining tax will be held in reserves for future development.

LMETA has not relied on angel investors, we have brought over liquidity from the METAFACE Project and rebranded to Lucky Metaverse.

Tokens at launch have a vesting period with PinkSale for 6 Months and LP is locked for 180 days, for the first 6 months after launch 3.3% of the total supply will be burned every month. We wanted to protect our investors from whale dumps, by burning tokens gradually will create scarcity of the LMETA Token and increase the price encouraging long term holders.

LMETA is keen to protect early contributors who participated in the pre-sale, we are providing a shock absorber against dumpers by giving you 2% of your holdings. This is locked for 2 months, also to prevent dumping.

LMETA is providing investors an opportunity to earn in multiple ways by holding, staking, P2E and purchasing/selling from the NFT Marketplace.

Utility of LMETA Token

Lucky Metaverse Token holders can receive 5% BnB passive income just by holding LMETA in their wallet. There will be weekly 1% lotteries for in-game players holding an NFT from our marketplace.

The set and forget type earning is our staking platform, where you can earn up to an APY of 60% where you opt-in for 30, 60 or 90 days.

- 5% BnB distribution to holders
- 1% rotational lottery for top 100 holders
- 60% staking APR for 30/60/90 days
- 19.89% token burn from total supply
- LMETA NFT roll out and Marketplace creation
- In- game rewards in BnB, LMETA and NFT on each level in respect to Tokens/XP gained
- Creating an LMETA merchandise store

LMETA is planning for future integration of WEB 3.0 into the METAWORLD.

ROADMAP

Q 02
- Website release - Migration of old holders
- 2.5k holders (suprise 1)   - Staking feature release
- 5k holders (suprise 2)
- 2nd CEX listing (First listing on P2PB2B just they need to change token API)
- Bridge to 3 other chains - Certik audit onboarding

Q 03
- P2E game release
- NFT collection   - 3rd and 4th CEX listings (Binance)
- 10k holders (big suprise)
- Planning and designing merchandise store

Q 04
- Grand opening of merchandise store   - 5th CEX listings
- 20k holders (big suprise 2)   - User-Generated Events
- Partnership with Game Guilds   - Multichain Integration
- VR Gallery Release - Community Events in VR mode
- Launch of the Game in Metaverse

NOTE :
If you noticed in the roadmap, we didn't put "first CEX listing" this is because we are listed on an exchange P2PB2B before it's just to change the website API.
